On a journey to become a software engineer, aspiring to make a global impact through coding

I am a dedicated Computer Science student at 42RomaLuiss, part of the renowned 42 Network, with 4 years of hands-on coding experience. My passion for technology and programming drives me to constantly seek out new challenges and learning opportunities. I enjoy working on projects that push my limits, whether it's building software, exploring new technologies, or solving complex problems. My goal is to grow as a software engineer while contributing to innovative solutions.

Skills:

Dart

Flutter

Python

Javascript

C

C++

PHP

Java

HTML

CSS

Solidity

Supabase

Firestore

Experience

- Precimet H.C.E. [precimet.pl](#)

May 2024 to Present

IT Administration Łódź, Poland

As an IT Administrator at Precimet, I maintain the infrastructure and enhance existing solutions to ensure efficient, secure, and scalable operations.

- Converting an internal solution to an online subscription-based service.
- Las Palmas Łódź [laspalmaslodz.pl](#)

Jun 2021 to Sep 2021

Barback Łódź, Poland

Education

- University of Technology in Gdańsk [pg.edu.pl](#)

Sep 2022 to Jul 2024

Bachelor of Science, Computer Science
- 42RomaLuiss [42roma.it](#)

Sep 2023

Expert en Architecture Informatique, Computer Science

Activities and Societies: I am an active member of the 42RomaLuiss Startup Club, collaborating with peers to explore entrepreneurial ideas and innovative solutions. I have also participated in a Web3 Hackathon organized by Urbe.eth, which allowed me to further my skills in blockchain technology and decentralized applications.

I am currently a Computer Science student at 42RomaLuiss, part of the 42 Network, where I am constantly challenged to solve real-world problems through project-based learning.

Projects

Hitspot
[hitspot.app](#)

As the Chief Executive Officer and co-creator of Hitspot, I work closely with a friend to bring our shared vision to life. Together,

we developed an app that enables users to discover, share, and explore hidden gems around the world, focusing on delivering a seamless and engaging experience.

Dart, Typescript, Python, PL/pgSQL, Firebase, Supabase, Flutter, Postgres

Kugafraga

 drive.google.com/file/d/1FJH3YDl0oV5dLA01uzhJ76LzWuowv1rC/view?usp=drivesdk

 github.com/gabref/kugafraga

A prototype of a blockchain-based, airport luggage tracking system developed during the Urbe Eth Hacktown.

JavaScript, Solidity, Shell, CSS, TypeScript, Hardhat

Mechanical Drawing Analyser

 github.com/Kuba2901/precimet_drawing_analyser

The Mechanical Drawing Analyzer is a Python-based tool designed to facilitate the analysis of mechanical drawing files.

Python

42_push_swap

 github.com/Kuba2901/42_push_swap

This project is designed to sort a stack of integers using a minimal number of operations and two stacks.

C, Makefile

42_piscine

 github.com/Kuba2901/42_piscine

A comprehensive collection of my exercises and projects from the 42Piscine bootcamp.

Shell, Makefile, C

gd_web_applications_development

 github.com/Kuba2901/gd_web_applications_development

A web application project developed for the Gdańsk University of Technology course, featuring HTML, CSS, JavaScript, and jQuery components to create a responsive and interactive user experience.

HTML, Hack, JavaScript, CSS, PHP
